Bobbing cutting machine BPW is designed for cutting PE foam with maximum 12 mm, PVC foils, artificial leather and paper. The machine is equipped with mechanical regulation system for width and length cutting, electrical controlling system and safety buttons. There is also possibility of installing antistatic system.

Main industrial appliances:

- home & office decorating industry
- paper industry
- billboards and advertising

Technical specification:

- slitting paper, foam and artificial leather
- max. width of the roll 1500mm
- max. diameter of coil 760mm
- max. diameter of roll 400 mm
- max. weight of the roll 60kg
- electric setting of the cut size, speed, number of cycles (touch screen)
- electrical connection 2,5kW
- compressed air requirements 0,6MPa
- measuring rollers drive by motoreductor
- cutting along with razor blades (10 pieces)
- lowering and lifting the razor blades by pneumatic servomotor
- accuracy +/- 1mm
- compressed air usage 5l only when changing materials for lowering and lifting roller with blades
